

The Blueprint to Finding Leaks and Closing Them.

A Forensic Operations Dossier for Mid-Market Scaling.

AETHERIS | Confidential diagnostic protocols.

The Illusion of Growth

Companies generating \$3M–\$8M annually routinely lose **10-30% of top-line revenue** to invisible operational friction.

What looks like growth is often fragility disguised as success. The actual leak isn't in lead generation—it's in what happens when your operations can't keep up with your sales team.

We Do Not Advise. We Operate.

Traditional Consulting		The Aetheris Intervention	
Top-line growth & generic best practices	Focus	Post-sale operational leaks & granular forensics	
Subjective observation & advice	Method	The 7-Step Leak Audit™ & direct intervention	
Lead generation volume	Metric	Dollarized leak recovery & precise ROI	

Aetheris applies a surgical lens to convert hidden losses into realized profits.

The Four Unpatched Holes in Your Revenue Funnel

Leak 1: The Invisible Vendor Stack Tax™

BEFORE: BLOATED SaaS STACK

Disjointed tools, overlapping functions, no central control.

AFTER: CONSOLIDATED STACK (Aetheris Intervention)

Streamlined platform, unified data, single source of truth.

STAT BLOCK

30% of SaaS spend is **wasted** due to underutilization
[Statista, 2023]

CONTEXT

At \$5M-\$10M revenue, overlapping CRM functions and ignored licenses routinely cost upwards of \$50,000 annually.

IMPACT

It isn't just direct cost—it's the fragmentation of data and manual workarounds creating **systemic friction**.

Leak 2: The Pipeline Autopsy Leak™

Stat Block

58% of qualified leads stall or die due to internal handoff inefficiencies [CEB, 2022].

Context

What appears to be slow sales is actually a 174-day average sales cycle caused by process failure.

Impact

Proposal-to-close drop-off rates jump from 20% to 50% when sales lacks unified data.

Leak 3: The Client Churn Vortex

Stat Block

Increasing retention by 5% increases profits by 25%–95% [Bain & Company, 2001].

Context

Churn rarely stems from the service itself. It starts in the 14-day operational handoff gap.

Impact

A 40% delay in onboarding paperwork leads directly to a 15% increase in first-year churn.

Leak 4: Data Blindness

Stat Block

40% of employee time is spent on manual data consolidation [Deloitte, 2021].

Context

When disparate systems cannot speak to each other, the resulting numbers lie to you.

Impact

Without unified data, massive risks go undetected—like 80% of total revenue dangerously concentrated in just 4 accounts.

The Surgical Blueprint: The Leak Audit™

The Recovery Roadmap: Phase I Execution

Month 1 (Foundation)

Data Aggregation Engine, Vendor Downsizing (\$3-5k/mo savings)

Aetheris Integration: Forensic Operator, Data Engineer

Month 2 (Efficiency)

Workflow Automation (freeing 10-15 hrs/wk), Communication Protocol Overhaul

Aetheris Integration: Automation Specialist

Month 3 (Churn Prevention)

30/60/90-day engagement sequences, 20% faster support resolution

Aetheris Integration: CX Analyst

The Recovery Roadmap: Phase II Scalability

Autopsy of a \$7.8M IT Services Firm.

The Symptom:

Stagnant at 5% YoY growth despite increased marketing spend.

FALSE DIAGNOSIS: Founder believed lead generation was the problem.

FORENSIC FINDING:

Massive post-lead leakage. 185-day sales cycles, VP-level bottlenecks causing 35% proposal drop-off, and 21-day onboarding delays causing high churn risk.

The Impact of Surgical Intervention

	Before Aetheris		After Aetheris
Lead-to-Opportunity	12%	→	28%
Avg. Sales Cycle	185 days	→	90 days
Proposal-to-Close	65%	→	88%
Client Onboarding	21 days	→	7 days
Monthly SaaS Waste	\$12,000	→	\$2,500

Annualized Revenue Recovery = +\$1,475,000.

The Economic Cost Model: 800% ROI

Based on a standard \$100k, 6-month engagement. Every \$1 invested recovers \$8 of existing structural loss within 12 months.

System Failsafes & Risk Mitigation

	Scope Creep		Iterative Sprints prioritizing highest-impact financial leaks first.
	Internal Resistance		Establishing internal champions; excellent change management increases success 6x [Prosci].
	Flawed Data		The Operational X-Ray™ standardizes and validates raw data before any fixes are designed.
	Reversion to Old Habits		Month 6 handover instills ongoing System Health checkups and Revenue Autopsy™ mindsets internally.

Step One: The Forensic Diagnostic™

\$2,500

(Fully credited toward the subsequent Leak Audit™)

-
- 2-week intensive extraction of core data and workflows.
 - Identification of your top 3-5 structural revenue leaks.
 - Dollarized quantification of immediate financial impact.
 - Transparent consultation with our lead Forensic Operator.

We do not offer generic advice. We cut through the noise and show you exactly where you are bleeding capital.

Stop Guessing. Start Operating with Precision.

Don't let busy activity mask systemic revenue erosion.
Let's find the leaks and seal them.
